Biophysical Chemistry

Author Index to Volume 52 (1994)

Anderson, G.J., Haris, P.I., Chapman, D. and Drake, A.F.
The conformational equilibria of a renin inhibitor peptide in solution (52) 173

Begg, G.E., Ralston, G.B. and Morris, M.B.
A proton nuclear magnetic resonance study of the mobile regions of human erythroid spectrin (52) 63
Bell, J.A., see Gerstner, J.A. (52) 97
Beltramini, M., see Mazzini, A. (52) 145
Blein, J.-P., see Mikes, V. (52) 259
Briki, F. and Genest, D.
Canonical analysis of correlated atomic motions in DNA from molecular dynamics simulation (52) 35

Cavatorta, P., see Mazzini, A. (52) 145
Chapman, D., see Anderson, G.J. (52) 173
Chung, S.-H., see Kuyucak, S. (52) 15
Cioni, P., Gabellieri, E., Gonnelli, M. and Strambini, G.B.
Heterogeneity of protein conformation in solution from the lifetime of tryptophan phosphorescence (52) 25
Clendenning, J.B. and Schurr, J.M.
A model for the binding of *E. coli* single-strand binding protein to supercoiled DNA (52) 227
Clendenning, J.B., Naimushin, A.N., Fujimoto, B.S., Stewart, D.W. and Schurr, J.M.
Effect of ethidium binding and superhelix density on the supercoiling free energy and torsion and bending constants of p30δ DNA (52) 191
Clendenning, J.B., see Naimushin, A.N. (52) 219
Collange, E., see Mikes, V. (52) 259
Cramer, S.M., see Gerstner, J.A. (52) 97

Di Muro, P., see Mazzini, A. (52) 145
Drake, A.F., see Anderson, G.J. (52) 173

Favilla, R., see Mazzini, A. (52) 145
Fujimoto, B.S., see Clendenning, J.B. (52) 191
Fujimoto, B.S., see Naimushin, A.N. (52) 219

Gabellieri, E., see Cioni, P. (52) 25
Genest, D., see Briki, F. (52) 35
Gerstner, J.A., Bell, J.A. and Cramer, S.M.
Gibbs free energy of adsorption for biomolecules in ion-exchange systems (52) 97
Gill, S.C., see Sijpkes, A.H. (52) 75
Go, N., see Kitao, A. (52) 107
Gonnelli, M., see Cioni, P. (52) 25
Grasso, D., see Milardi, D. (52) 183
Gruenwedel, D.W.
Effect of Hg(II) on the spectroscopic properties of poly[d(A–T) · d(A–T)] and poly[d(A) · d(T)] and their constituent subunits (deoxyadenosine and thymidine monomers and dimers) (52) 115
Gryczynski, I., Johnson, M.L. and Lakowicz, J.R.
Analysis of anisotropy decays in terms of correlation time distributions, measured by frequency-domain fluorometry (52) 1
Gutheil, W.G.
Reformulation of thermodynamic systems with aggregation and theoretical methods for the analysis of ligand binding in proteins with monomer–multimer equilibria (52) 83

Haris, P.I., see Anderson, G.J. (52) 173
Hayward, S., see Kitao, A. (52) 107
Henniker, A. and Ralston, G.B.
Reinvestigation of the thermodynamics of spectrin self-association (52) 251
Hinz, H.-J., Vogl, T. and Meyer, R.
An alternative interpretation of the heat capacity changes associated with protein unfolding (52) 275
Hof, M., Hutterer, R., Pérez, N., Ruf, H. and Schneider, F.W.
Influence of vesicle curvature on fluorescence relaxation kinetics of fluorophores (52) 165
Hutterer, R., see Hof, M. (52) 165

Imasato, H., see Yushmanov, V.E. (52) 157

Johnson, M.L., see Gryczynski, I. (52) 1

Kim, U.-S., see Naimushin, A.N. (52) 219
Kitao, A., Hayward, S. and Go, N.
Comparison of normal mode analyses on a small globular protein in dihedral angle space and Cartesian coordinate space (52) 107
Kuyucak, S. and Chung, S.-H.
Temperature dependence of conductivity in electrolyte solutions and ionic channels of biological membranes (52) 15

Lakowicz, J.R., see Gryczynski, I. (52) 1
La Rosa, C., see Milardi, D. (52) 183
Lavernet, S., see Mikes, V. (52) 259

Mazzini, A., Beltramini, M., Favilla, R., Cavatorta, P., Di Muro, P. and Salvato, B.
An oxygenation-sensitive dye binding to *Carcinus maenas* hemocyanin (52) 145
Meyer, R., see Hinz, H.-J. (52) 275
Mikes, V., Lavernet, S., Milat, M.-L., Collange, E., Pâris, M. and Blein, J.-P.
Cercospora beticola toxins. Part VI: preliminary studies of protonation and complexation equilibria (52) 259
Milardi, D., La Rosa, C. and Grasso, D.
Extended theoretical analysis of irreversible protein thermal unfolding (52) 183
Milat, M.-L., see Mikes, V. (52) 259

Biophysical Chemistry 52 (1994) 289–293

Biophysical Chemistry

Subject Index to Volume 52 (1994)

Activity coefficient
Self-association; Excluded volume; Second virial coefficient; Oligomers; Sedimentation equilibrium; Ultracentrifuge (Ralston, G.B. (52) 51)

Ampicillin
Binding polynomials; Reference reaction; Equilibrium constant; Penicillin; Hydrolysis (Yap, W.T. (52) 125)

Anisotropy
Fluorescence; Frequency domain; Fluorometry; Correlation time distribution (Gryczynski, I. (52) 1)

Antibody binding
Kinetics; Antigen (Nygren, H. (52) 45)

Antigen
Kinetics; Antibody binding (Nygren, H. (52) 45)

Apparent equilibrium constant
Cyclic dipeptide; Aqueous urea solution; Solubility; Protein denaturation (Sijpkes, A.H. (52) 75)

Aqueous urea solution
Cyclic dipeptide; Solubility; Apparent equilibrium constant; Protein denaturation (Sijpkes, A.H. (52) 75)

Azurin
Proteins; Thermal unfolding (Milardi, D. (52) 183)

Beticolin
Protonation equilibrium; Magnesium complex; Fluorescence; Potentiometry (Mikes, V. (52) 259)

Binding
Hemocyanin; 4′,6-diamidino-2-phenylindole (DAPI); Fluorescence (Mazzini, A. (52) 145)

E. coli; Supercoiled DNA (Clendenning, J.B. (52) 227)

Binding polynomials
Reference reaction; Equilibrium constant; Penicillin; Ampicillin; Hydrolysis (Yap, W.T. (52) 125)

Bovine pancreatic trypsin inhibitor
Normal mode analysis; Dihedral angle space; Cartesian coordinate space; Important conformational subspace (Kitao, A. (52) 107)

pBR322 DNA
Ethidium binding; Superhelix density (Naimushin, A.N. (52) 219)

Canonical analysis
Computer Simulation; Correlated motions; DNA flexibility; Molecular dynamics (Briki, F. (52) 35)

Cartesian coordinate space
Normal mode analysis; Dihedral angle space; Bovine pancreatic trypsin inhibitor; Important conformational subspace (Kitao, A. (52) 107)

Circular dichroism
Renin inhibitor peptide; Conformation; Fourier Transform infrared; Nuclear magnetic resonance (Anderson, G.J. (52) 173)

Clustering
Limit cycle oscillator; Gap junctionally coupling (Nishiyama, N. (52) 139)

Compressibility
Protein unfolding; Heat capacity change; Expansion coefficients; Heat capacity at constant pressure and constant volume (Hinz, H.-J. (52) 275)

Computer Simulation
Canonical analysis; Correlated motions; DNA flexibility; Molecular dynamics (Briki, F. (52) 35)

Conductance-temperature relationship
Single ion channels; Temperature; Electrolytes; Ohm's law; Ion transport (Kuyucak, S. (52) 15)

Configurational entropy
Spectrin; Nuclear magnetic resonance; Conformational change; Erythrocyte; Random coil (Begg, G.E. (52) 63)

Conformation
Renin inhibitor peptide; Fourier Transform infrared; Nuclear magnetic resonance; Circular dichroism (Anderson, G.J. (52) 173)

Conformational change
Spectrin; Nuclear magnetic resonance; Configurational entropy; Erythrocyte; Random coil (Begg, G.E. (52) 63)

Constituent dimer
Mercuric ion effect; Spectral property; Synthetic polynucleotide; Constituent monomer; Dipole strength, oscillator strength, hypochromism (Gruenwedel, D.W. (52) 115)

Constituent monomer
Mercuric ion effect; Spectral property; Synthetic polynucleotide; Constituent dimer; Dipole strength, oscillator strength, hypochromism (Gruenwedel, D.W. (52) 115)

Correlated motions
Canonical analysis; Computer Simulation; DNA flexibility; Molecular dynamics (Briki, F. (52) 35)

Correlation time distribution
Fluorescence; Anisotropy; Frequency domain; Fluorometry (Gryczynski, I. (52) 1)

Cyclic dipeptide
Aqueous urea solution; Solubility; Apparent equilibrium constant; Protein denaturation (Sijpkes, A.H. (52) 75)

4′,6-diamidino-2-phenylindole (DAPI)
Hemocyanin; Fluorescence; Binding (Mazzini, A. (52) 145)

Dihedral angle space
Normal mode analysis; Cartesian coordinate space; Bovine pancreatic trypsin inhibitor; Important conformational subspace (Kitao, A. (52) 107)

Diphytanoyl lecithin monolayers
Patch clamp; Electrophoretic DNA transfer; Long-lived conductive state; Plasmid DNA (Spassova, M. (52) 267)

Dipole strength, oscillator strength, hypochromism
Mercuric ion effect; Spectral property; Synthetic polynucleotide; Constituent monomer; Constituent dimer (Gruenwedel, D.W. (52) 115)

p30δ DNA
Ethidium binding; Superhelix density (Clendenning, J.B. (52) 191)

DNA flexibility
Canonical analysis; Computer Simulation; Correlated motions; Molecular dynamics (Briki, F. (52) 35)

Dynamic light scattering
Time-resolved fluorescence; Membrane curvature; Solvent relaxation (Hof, M. (52) 165)

E. coli
Supercoiled DNA; Binding (Clendenning, J.B. (52) 227)

Electrolytes
Single ion channels; Temperature; Conductance-temperature relationship; Ohm's law; Ion transport (Kuyucak, S. (52) 15)

Electrophoretic DNA transfer
Patch clamp; Long-lived conductive state; Plasmid DNA; Diphytanoyl lecithin monolayers (Spassova, M. (52) 267)

Equilibrium constant
Binding polynomials; Reference reaction; Penicillin; Ampicillin; Hydrolysis (Yap, W.T. (52) 125)

Erythrocyte
Spectrin; Nuclear magnetic resonance; Conformational change; Configurational entropy; Random coil (Begg, G.E. (52) 63)

Ethidium binding
Superhelix density; p30δ DNA (Clendenning, J.B. (52) 191)

Superhelix density; pBR322 DNA (Naimushin, A.N. (52) 219)

Excluded volume
Self-association; Activity coefficient; Second virial coefficient; Oligomers; Sedimentation equilibrium; Ultracentrifuge (Ralston, G.B. (52) 51)

Expansion coefficients
Protein unfolding; Heat capacity change; Compressibility; Heat capacity at constant pressure and constant volume (Hinz, H.-J. (52) 275)

Fluorescence
Anisotropy; Frequency domain; Fluorometry; Correlation time distribution (Gryczynski, I. (52) 1)

Hemocyanin; 4′,6-diamidino-2-phenylindole (DAPI); Binding (Mazzini, A. (52) 145)

Protonation equilibrium; Magnesium complex; Beticolin; Potentiometry (Mikes, V. (52) 259)

Fluorometry
Fluorescence; Anisotropy; Frequency domain; Correlation time distribution (Gryczynski, I. (52) 1)

Fourier Transform infrared
Renin inhibitor peptide; Conformation; Nuclear magnetic resonance; Circular dichroism (Anderson, G.J. (52) 173)

Frequency domain
Fluorescence; Anisotropy; Fluorometry; Correlation time distribution (Gryczynski, I. (52) 1)

Gap junctionally coupling
Limit cycle oscillator; Clustering (Nishiyama, N. (52) 139)

Hard ellipsoids of revolution
Nonideal solutions; Small-angle scattering; Monte Carlo simulation; Interparticle interaction; Human serum albumin (Sjöberg, B. (52) 131)

Heat capacity at constant pressure and constant volume
Protein unfolding; Heat capacity change; Expansion coefficients; Compressibility (Hinz, H.-J. (52) 275)

Heat capacity change
Protein unfolding; Expansion coefficients; Compressibility; Heat capacity at constant pressure and constant volume (Hinz, H.-J. (52) 275)

Hemocyanin
4′,6-diamidino-2-phenylindole (DAPI); Fluorescence; Binding (Mazzini, A. (52) 145)

Human serum albumin
Nonideal solutions; Small-angle scattering; Monte Carlo simulation; Interparticle interaction; Hard ellipsoids of revolution (Sjöberg, B. (52) 131)

Hydrolysis
Binding polynomials; Reference reaction; Equilibrium constant; Penicillin; Ampicillin (Yap, W.T. (52) 125)

Hydrophobic interactions
Spectrin; Sedimentation equilibrium; Ultracentrifuge; Thermodynamics; Van't Hoff (Henniker, A. (52) 251)

Important conformational subspace
Normal mode analysis; Dihedral angle space; Cartesian coordinate space; Bovine pancreatic trypsin inhibitor (Kitao, A. (52) 107)

Interaction
Papaverine; Vasodilator drug; Micelle; Surfactant; NMR (Yushmanov, V.E. (52) 157)

Interaction energy
Protein adsorption; Ion-exchange (Gerstner, J.A. (52) 97)

Interparticle interaction
Nonideal solutions; Small-angle scattering; Monte Carlo simulation; Hard ellipsoids of revolution; Human serum albumin (Sjöberg, B. (52) 131)

Ion-exchange
Protein adsorption; Interaction energy (Gerstner, J.A. (52) 97)

Ion transport
Single ion channels; Temperature; Conductance-temperature relationship; Electrolytes; Ohm's law (Kuyucak, S. (52) 15)

Kinetics
Antibody binding; Antigen (Nygren, H. (52) 45)

Ligand binding
Thermodynamic systems; Proteins (Gutheil, W.G. (52) 83)

Limit cycle oscillator
Gap junctionally coupling; Clustering (Nishiyama, N. (52) 139)

Long-lived conductive state
Patch clamp; Electrophoretic DNA transfer; Plasmid DNA; Diphytanoyl lecithin monolayers (Spassova, M. (52) 267)

Magnesium complex
Protonation equilibrium; Beticolin; Fluorescence; Potentiometry (Mikes, V. (52) 259)

Membrane curvature
Time-resolved fluorescence; Solvent relaxation; Dynamic light scattering (Hof, M. (52) 165)

Mercuric ion effect
Spectral property; Synthetic polynucleotide; Constituent monomer; Constituent dimer; Dipole strength, oscillator strength, hypochromism (Gruenwedel, D.W. (52) 115)

Micelle
Papaverine; Vasodilator drug; Interaction; Surfactant; NMR (Yushmanov, V.E. (52) 157)

Molecular dynamics
Canonical analysis; Computer Simulation; Correlated motions; DNA flexibility (Briki, F. (52) 35)

Monte Carlo simulation
Nonideal solutions; Small-angle scattering; Interparticle interaction; Hard ellipsoids of revolution; Human serum albumin (Sjöberg, B. (52) 131)

NMR
Papaverine; Vasodilator drug; Micelle; Interaction; Surfactant (Yushmanov, V.E. (52) 157)

Nonideal solutions
Small-angle scattering; Monte Carlo simulation; Interparticle interaction; Hard ellipsoids of revolution; Human serum albumin (Sjöberg, B. (52) 131)

Normal mode analysis
Dihedral angle space; Cartesian coordinate space; Bovine pancreatic trypsin inhibitor; Important conformational subspace (Kitao, A. (52) 107)

Nuclear magnetic resonance
Spectrin; Conformational change; Configurational entropy; Erythrocyte; Random coil (Begg, G.E. (52) 63)

Renin inhibitor peptide; Conformation; Fourier Transform infrared; Circular dichroism (Anderson, G.J. (52) 173)

Ohm's law
Single ion channels; Temperature; Conductance-temperature relationship; Electrolytes; Ion transport (Kuyucak, S. (52) 15)

Oligomers
Self-association; Excluded volume; Activity coefficient; Second virial coefficient; Sedimentation equilibrium; Ultracentrifuge (Ralston, G.B. (52) 51)

Papaverine
Vasodilator drug; Micelle; Interaction; Surfactant; NMR (Yushmanov, V.E. (52) 157)

Patch clamp
Electrophoretic DNA transfer; Long-lived conductive state; Plasmid DNA; Diphytanoyl lecithin monolayers (Spassova, M. (52) 267)

Penicillin
Binding polynomials; Reference reaction; Equilibrium constant; Ampicillin; Hydrolysis (Yap, W.T. (52) 125)

Plasmid DNA
Patch clamp; Electrophoretic DNA transfer; Long-lived conductive state; Diphytanoyl lecithin monolayers (Spassova, M. (52) 267)

Potentiometry
Protonation equilibrium; Magnesium complex; Beticolin; Fluorescence (Mikes, V. (52) 259)

Protein adsorption
Interaction energy; Ion-exchange (Gerstner, J.A. (52) 97)

Protein conformation
Tryptophan phosphorescence; Substrates (Cioni, P. (52) 25)

Protein denaturation
Cyclic dipeptide; Aqueous urea solution; Solubility; Apparent equilibrium constant (Sijpkes, A.H. (52) 75)

Proteins
Thermodynamic systems; Ligand binding (Gutheil, W.G. (52) 83)

Thermal unfolding; Azurin (Milardi, D. (52) 183)

Protein unfolding
Heat capacity change; Expansion coefficients; Compressibility; Heat capacity at constant pressure and constant volume (Hinz, H.-J. (52) 275)

Protonation equilibrium
Magnesium complex; Beticolin; Fluorescence; Potentiometry (Mikes, V. (52) 259)

Random coil
Spectrin; Nuclear magnetic resonance; Conformational change; Configurational entropy; Erythrocyte (Begg, G.E. (52) 63)

Reference reaction
Binding polynomials; Equilibrium constant; Penicillin; Ampicillin; Hydrolysis (Yap, W.T. (52) 125)

Renin inhibitor peptide
Conformation; Fourier Transform infrared; Nuclear magnetic resonance; Circular dichroism (Anderson, G.J. (52) 173)

Second virial coefficient
Self-association; Excluded volume; Activity coefficient; Oligomers; Sedimentation equilibrium; Ultracentrifuge (Ralston, G.B. (52) 51)

Sedimentation equilibrium
Self-association; Excluded volume; Activity coefficient; Second virial coefficient; Oligomers; Ultracentrifuge (Ralston, G.B. (52) 51)

Spectrin; Ultracentrifuge; Thermodynamics; Hydrophobic interactions; Van't Hoff (Henniker, A. (52) 251)

Self-association
Excluded volume; Activity coefficient; Second virial coefficient; Oligomers; Sedimentation equilibrium; Ultracentrifuge (Ralston, G.B. (52) 51)

Single ion channels
Temperature; Conductance-temperature relationship; Electrolytes; Ohm's law; Ion transport (Kuyucak, S. (52) 15)

Small-angle scattering
Nonideal solutions; Monte Carlo simulation; Interparticle interaction; Hard ellipsoids of revolution; Human serum albumin (Sjöberg, B. (52) 131)

Solubility
Cyclic dipeptide; Aqueous urea solution; Apparent equilibrium constant; Protein denaturation (Sijpkes, A.H. (52) 75)

Solvent relaxation
Time-resolved fluorescence; Membrane curvature; Dynamic light scattering (Hof, M. (52) 165)

Spectral property
Mercuric ion effect; Synthetic polynucleotide; Constituent monomer; Constituent dimer; Dipole strength, oscillator strength, hypochromism (Gruenwedel, D.W. (52) 115)

Spectrin
Nuclear magnetic resonance; Conformational change; Configurational entropy; Erythrocyte; Random coil (Begg, G.E. (52) 63)

Sedimentation equilibrium; Ultracentrifuge; Thermodynamics; Hydrophobic interactions; Van't Hoff (Henniker, A. (52) 251)

Substrates
Tryptophan phosphorescence; Protein conformation (Cioni, P. (52) 25)

Supercoiled DNA
E. coli; Binding (Clendenning, J.B. (52) 227)

Superhelix density
Ethidium binding; p30δ DNA (Clendenning, J.B. (52) 191)

Ethidium binding; pBR322 DNA (Naimushin, A.N. (52) 219)

Surfactant
Papaverine; Vasodilator drug; Micelle; Interaction; NMR (Yushmanov, V.E. (52) 157)

Synthetic polynucleotide
Mercuric ion effect; Spectral property; Constituent monomer; Constituent dimer; Dipole strength, oscillator strength, hypochromism (Gruenwedel, D.W. (52) 115)

Temperature
Single ion channels; Conductance-temperature relationship; Electrolytes; Ohm's law; Ion transport (Kuyucak, S. (52) 15)

Thermal unfolding
Proteins; Azurin (Milardi, D. (52) 183)

Thermodynamics
Spectrin; Sedimentation equilibrium; Ultracentrifuge; Hydrophobic interactions; Van't Hoff (Henniker, A. (52) 251)

Thermodynamic systems
Ligand binding; Proteins (Gutheil, W.G. (52) 83)

Time-resolved fluorescence
Membrane curvature; Solvent relaxation; Dynamic light scattering (Hof, M. (52) 165)

Tryptophan phosphorescence
Protein conformation; Substrates (Cioni, P. (52) 25)

Ultracentrifuge
Self-association; Excluded volume; Activity coefficient; Second virial coefficient; Oligomers; Sedimentation equilibrium (Ralston, G.B. (52) 51)

Spectrin; Sedimentation equilibrium; Thermodynamics; Hydrophobic interactions; Van't Hoff (Henniker, A. (52) 251)

Van't Hoff
Spectrin; Sedimentation equilibrium; Ultracentrifuge; Thermodynamics; Hydrophobic interactions (Henniker, A. (52) 251)

Vasodilator drug
Papaverine; Micelle; Interaction; Surfactant; NMR (Yushmanov, V.E. (52) 157)
